City of Nashua, Feb. 25th, 1861.

E. P. EMERSON, City Treas'r.

---

CITY OF NASHUA, FEB. 25TH, 1861.

The undersigned, the Committee on Finance of the City Council of said city, certify, that in accordance with the provisions of an Ordinance of said city, we have this day examined the foregoing account of Edward P. Emerson, City Treasurer, and find the same to be correctly cast, and each payment properly vouched by a treasury order for the same, corresponding in amount with the vouchers in the hands of the City Clerk.— We have also examined the sources from which the income of the past year has been derived, and are satisfied that he has charged himself with the whole amount paid into the Treasury.

We find that the total receipts into the Treasury during the past year, including the fourteen hundred and forty-three dollars and one cent, (\$1443 01) on hand at the commencement, have been forty-one thousand two hundred and twenty-seven dollars and fifty-four cents, (\$41,227 54.)

The total payments during the same time have been thirty-seven thousand four hundred and eighty-one dollars and eighty cents, (\$37,481 80,) leaving the balance in the treasury this

day three thousand seven hundred and forty-five dollars and seventy-four cents, (\$3,745 74,) which sum has been shown and counted this day.

A. W. SAWYER,	}	Committee on Fi-	
S. F. WRIGHT,			nance of the
CHARLES LOVEJOY,			City of Nashua.

The city were liable for the appropriation of 1859-60, which was not paid until April 7, 1860.

*“Resolution transferring certain appropriations in the year 1861.”*

*“Resolved, by the Mayor and Aldermen and Common Council of the city of Nashua in City Council assembled, as follows :*

*That it shall be lawful to take from any excess of any appropriation above the expenditure of any particular department for which money was raised the past year, and appropriate such sum or sums as may be necessary to defray the expenditures of any other department when the expenditures have exceeded the appropriation, and the Mayor and City Clerk are authorized to draw orders accordingly.”*

			<hr/> \$3545 98

Amount overdrawn, \$405 80

N. B. The foregoing expenditures include a large amount of old bills,—there are bills outstanding due C. H. Nutt,—also, E. P. Emerson for labor and teams since 1 Nov. 1860 ; Mr. Saunders has a bill also unsettled, but he has charged nothing for his services as street commissioner and will not charge anything—the foregoing also includes the expense of building the sewer from Pearson's Avenue to Park street. In months of December, January and part of February, there have been unusual outlays on the Highways on account of the snow and the appropriation was found entirely inadequate to meet the necessary expenditure,—the committee have not recommended an additional appropriation as has been usual, but have found ample means in the other appropriations not expended for their particular departments to meet the excess in this department above the appropriation,—the sum raised in 1857 and 1858 for Highways was \$4000 each year and in 1857 amount expended was \$4160 15.

Payments authorized for which no appropriation was made.

Paid Almira B. Moore, damages defect in highway on Main Street, opposite Rev. Mr. Hill's church,	<u>\$300 00</u>

# R E P O R T

OF THE

CHIEF ENGINEER OF THE FIRE DEPARTMENT.

---

CITY OF NASHUA, ENGINEER'S OFFICE, }  
FIRE DEPARTMENT, FEB'Y 20, 1861. }

*To the Hon. Board of Mayor and Aldermen :*

In conformity with Section 6 of an "Ordinance relating to the fire department," I herewith transmit to you a list of the officers and members attached to the Nashua fire department, together with their ages, residences, and occupations; also a statement of the condition of the apparatus under their charge; the number of fires and alarms during the past year; the number of hydrants and reservoirs from which water can be obtained in case of fire; with such other information as may seem necessary.

In accordance with the duties of the Chief Engineer, he has from time to time made thorough examination of the several machines and apparatus belonging to the City, and in use for the extinguishment of fires, and is pleased to report the same in ample order and condition for the purposes intended, excepting a part of the hose, which has by usage become imperfect and comparatively worthless. That deficiency, however, is about being made good by the purchase of one thousand feet of leather leading hose, which has been ordered by authority of the City Council and will soon be delivered.

The number of fires and alarms during the past year, to which the Department have been called out since Feb. 20, 1860, are fourteen. The amount of loss attending these fires and alarms, as nearly as can be ascertained, is \$6810 00. The amount of insurance on the same is \$5570 00.

I would call your attention to the condition of the several Engine Houses at this time.

The house on High St. should be raised. It is now so low that the floor timbers are insecure (from decay,) otherwise, it is in very good condition.

The house on Lowell St. has settled so much I have been obliged to secure it by bolts to prevent its falling. A substantial wall will have to be built, on the South east side, in place of the wood-work, to make it secure, and a new floor laid in the room occupied by Engine Co., No. 4.

The house on West Olive street is in good repair.

During the past year we were compelled to remove Engine No. 1 to house on West Olive St. Under the circumstances we could do no other way, nor have we been able to do otherwise, since the Hook and Ladder, and Hose Company, and No. 1 Engine Co., now occupy the same house, to the very great inconvenience of both companies, and I very much hope the bill authorizing the building of a new house, to be located in Ward 6, which bill is now before the City Council, will pass. The interest of the fire department, as well as the safety of property demands it.

The deep snow of the past winter has convinced us of the importance of having the location of some of the Hydrants changed to the sidewalks, where they can be made more available.

The importance of a more regular system of alarms, is more and more evident on every occasion of fire. Heretofore the City has been dependent upon bells owned by societies and corporations, said bells not being at all times accessible, consequently alarms are not at all times complete, therefore, I would suggest that the public good will be promoted, by having a central alarm bell placed upon the City Hall building. During the past year the Munroe Tub, No. 2, has been over-hauled and re-painted, put in good condition, and placed in the hands of Engine Co. No. 1, in exchange for their New York machine, that company desiring the exchange, there are now therefore 2 machines out of commission, and so situated that they are constantly depreciating in value—therefore I would earnestly recommend that they be disposed of at an early day.

The subject of the purchase of a Steam Fire Engine has been somewhat agitated, and from my position at the present time it may be expected that some notice will be taken of the subject in this report. The matter has from time to time been investigated by myself and those associated with me, and at all times the interests of the City were paramount in our deliberations. We have arrived at the conclusion that the City and its inhabitants are well protected against loss or damage by fire under the present arrangements. The Hydrants of the Pennichuck Water

Works, together with a good and efficient Fire Department place us in a position of security, second to no other City or Town in New England—the experience of the past must convince us that for a fire to spread to any great extent is next to impossible, and that about as much damage is done by water as fire.

In closing I take the opportunity to observe that our Fire Department continues to maintain the high reputation, that it so justly deserves, and on all occasions has been courteous to their officers, and prompt in the discharge of their duties.

Respectfully submitted,

ISAAC EATON, Chief Engineer.

2 hose carriages built by J. W. Moore, in 1855. 600 ft. of hose, part of which is poor—should be supplied with 300 or 400 ft. of new hose. The carriages have been varnished during the past year.

---

### RECAPITULATION.

6 Engineers ; 186 Firemen ; 5 Engines, (2 of which are not in use ;) 3850 feet Leading Hose, (a part of which is not reliable;) 118 ft. of Suction Hose ; 9 Hose Carriages.

The City has 52 Hydrants and 7 Reservoirs for the use of the department.

All Engines, Hose, Hose Carriages, Hooks, Ladders und Carriages, &c., are owned by the City.

---

[For Schedule of Property of Fire Department see page 33.]

Two Engines not in service. No. 1 built by James Smith, N. Y. and has been used by Torrent Engine Co. No. 1. It is not in working order. Suction hose are poor.

The other is the T. W. Gillis Tub, not a suction machine, in working order. Neither of the above are of any use to the city, and ought to be sold as they are decreasing in value by keeping.
